World Environmental Day Celebrations – PRAKRITI – 2021

Date & Venue : 04.06.2021, St. Paul's College, Kalamassery

An online webinar on Green Materials was organized by the Department of Chemistry on 04/06/2021 at 3.00 pm. The talk was handled by Dr. Sreekala M. S, Assistant Professor and Research guide in Chemistry. Department of Chemistry, Sree Sankara College, Kalady. The programme was conducted as a part of World environmental Day Celebrations of the department, PRAKRITI-2021. The resource person highlighted the need and role of sustainable green technologies in the ecosystem restoration, which was also the theme of this year's WED. She explained the applications of natural resource materials such as starch and cellulose-based composites of plant origin. Dr. Tresa Sunitha George and Hency George were the coordinators of the programme. Student coordinator Elsa Augustine offered the vote of thanks. Students could get a clear understanding of the role of using sustainable resources for ecosystem restoration.

“Only One Earth” World Environment Day - ‘Plant A Sapling’

Venue : Garden of students and faculties at their own home.

Date : 05th June 2022

Time : 10:00 AM

Number of teacher participants: 4

Number of student participants: 96

World Environment Day is celebrated on June 5th every year to raise global awareness on the importance of protecting environment. As a part of creating an awareness on protecting and sustaining the environment, every year the department of commerce as undergone many programs.. The Department has conducted a meeting todiscuss about how to celebrate world environment day and it was decided to have a photo collage of planting a sapling by all the faculty members and students of the department.The class in charge of all the years had communicated about the program to their respective students on the same day and had obtained positive responses from the students. Each of the students and faculties of the department had plant a sapling and took a photo of the same and all the photos are combined to have a beautiful videoand a Photo Collage.

Benefits in terms of skill: This initiative of the department has obtained a great appreciation from the students and it make the students to a relief from the present situation and to have a hope of good sign in the near future.

3 R Challenge in 3 Days

Organised by: Department of Tourism and Hospitality Management, St. Paul's College, Kalamassery

Date : 05/06/2021

Number of Participants :10

Report:

As part of World Environment Day celebrations, 2021 a unique programme was organised by Department of Tourism and Hospitality Management, St. Paul's College, Kalamassery. As part of Ecosystem Restoration, the department came up with '3R Challenge in 3 Days'. The objective of this programme was to inculcate the spirit of environment consciousness in students through the concepts – Reduce, Reuse and Recycle. The students came up with distinct ideas of reusing the waste materials like plastic, paper etc.

3R CHALLENGE IN 3 DAYS

The 3 'R's – Reduce, Reuse, Recycle – are all about minimising the amount of waste we produce, reusing products as much as we can, and remembering to recycle any materials that can be used for a new purpose.

To help you all get started, we're kicking off this 'World Environment Day' with a 3 day Challenge! There are no rules to the challenge - you don't have to do it in order or try all the suggestions. Any changes you can make are great!

REDUCE: THE FIRST 'R' IS ALL ABOUT CREATING LESS WASTE. HERE ARE SOME OF THE WAYS YOU CAN DO THIS:

- Look for items you can re-use
- Water is a precious resource. How can you use less of it?
- Recycling old items helps to reduce waste sent to landfill.

REDUCING THE AMOUNT OF WASTE WE ALL GENERATE IS A GREAT WAY TO BENEFIT THE ENVIRONMENT

REUSE: THE SECOND 'R' LOOKS AT HOW YOU CAN USE CERTAIN ITEMS AGAIN (IDEALLY MULTIPLE TIMES) BEFORE REPLACING THEM. HERE ARE SOME IDEAS:

- Refill a water bottle with water from home instead of buying a new one.
- Update your computer rather than throwing it out and getting a replacement.
- Ditch plastic bags and choose reusable, environmental-friendly bags instead.

A BONUS OF REUSING? AS WELL AS HELPING THE ENVIRONMENT, YOU COULD SAVE MONEY TOO!

RECYCLE: THE THIRD 'R' IS ABOUT MAKING SURE YOU SEPARATE ITEMS THAT CAN BE RECYCLED, MEANING THEY CAN BE USED FOR A NEW PURPOSE.

- Before you throw something away, think about whether all or part of it could be recycled.

NOW, START MAKING YOUR OWN PRODUCTS OUT OF RECYCLABLE MATERIALS!

Also keep a log of the actions you have taken and share with us the works you've done in the 3 days as part of the challenge.

Email your works along with your name, college name and contact number to tourism@stpauls.ac.in
E-Certificates will be issued to the qualified participants.

Creativity Out of Debris

Report:

As part of World Environment Day celebration 2021, an inter-department competition- “Creativity Out of Debris” was organized by the Department of Chemistry in association with Nature club and ENCON Club. The participants were asked to use their imagination to create something useful from waste materials. Asna T. A., I BA English Model 2 secured first prize, Riya K. W., III BCom CA Aided secured second prize and Alan Manuel Pinhero I B.Sc. Industrial chemistry secured third prize.

Outcome:

The purpose of World Environment Day is to spread awareness about the threat to the environment due to rising pollution levels and climate change. “World Environment Day is a reminder for us to pause and reflect on our actions and their subsequent consequences on the planet. The programme provided an opportunity to students to develop their creativity and widen their imagination. This also open up a novel path to Reduce and Reuse the waste materials and thereby encouraging our younger generation to protect earth.

Webinar on Herbal Garden in pandemic Times

Date: 9th June, 2021

No. of participants: 60

Report: Departments of English and Economics organized a Webinar on Herbal Garden in Pandemic Times on 9th June , 2021, Time: 10.30 am via Google Meet. The Resource Person was Dr. Gracy Mathew, Professor, AMPRS, Kerala Agricultural University, Odakkali. The Coordinators were Deepa George, Asst. Professor and Head, Dept.of English, Dr. Sumitha Franklin Vice Principal and Green Coordinators Dhanya B Abraham and Muhammed Suhail.

Outcome: The department of English maintains a herbal garden. So the students could get insights into how to maintain it better. The talk also inspired students to relax themselves preparing a herbal garden at home which would provide home remedies. The session also gave insights regarding the rich resources available in nature.

World Environment Day 2021- Webinar on Ecosystem Restoration

Speaker: Mr. Benoy Thomas M P, Assistant Professor, Dept of Botany, Govt. Victoria College, Palakkad

Date : 8th June 2021

Platform: Google meet

Number of participants: 70

Organizer: Department of Physics

Convener- Ms. Jixy Joseph

Brief Report:

On June 5 every year the nature empaths around the globe celebrate World Environment Day to encourage awareness and observe its protection. This year the theme of World Environment Day was “Reimagine. Recreate. Restore “.To highlight the importance of ecosystem restoration the Department of Physics of St. Pauls college Kalamassery organised a webinar on the topic “Ecosystem Restoration” on 8th June 2021 at 10:00 am via Google platform as a part of World Environment Day. Mr Benoy Thomas M. P, Assistant Professor, Department of Botany of Govt. Victoria College Palakkad served as the resource person. The program was commenced by the welcome note from Dr. Rajeshmon V.G,Department of Physics, St Pauls College Kalamassery. Mr Benoy talked about how to repair our fractured relationship with nature and the importance of ecosystem restoration. The program received a huge positive response from the students and at the end of the webinar the students asked their doubts to which the speaker answered in detail. Dr. Poornima N delivered the vote of thanks.

Outcome Achieved:

The main aim of the webinar was to emphasize that our aim should be to heal nature and not exploit it. World Environment Day is a reminder for us to pause and reflect on our actions and their subsequent consequences on the planet.

Understanding the Ocean, Environment and Climate

Date & Venue : 08.06.2021, St. Paul's College, Kalamassery

As part of world ocean day celebration 2021, Department of Chemistry in association with Nature Club and ENCON Club, St. Paul's College, Kalamassery organized an invited talk on “Understanding the Ocean, Environment and Climate” on 08.06.2021. The resource person was Dr. Jayakrishnan P R, Assistant Professor, College of Climate Change and Environmental Science, Kerala Agricultural University, Vellanikkara, Thrissur. This webinar helped the students to understand the importance and significance of Oceanic systems in the climatic changes and conditions, as well as its impact on environmental changes.

World coconut day celebrations

Date & Venue: 02.09.2021, St. Paul's College, Kalamassery

No. of participants: 12

World Coconut Day is celebrated to emphasize and raise awareness about the importance as well as benefits of coconuts. Department of Chemistry in association with Nature Club celebrated World Coconut Day on 02/09/2021 by planting coconut sapling in college campus.

Ozone day celebrations 2021

Date: 16.09.2021

No. of participants: 3

Venue: St. Paul's College, Kalamassery

Report

Nature Club in association with Department of Chemistry organized a painting competition as part of World Ozone Day celebration. The theme of painting competition is Mother Nature. Anisha Maria Job, II BA English Model II, secured first prize, Dixon D'Silva 2nd year B.A. English model II, secured second prize and Anald Thomas 2nd year B.A. English model II, secured third prize.

Outcome:

The purpose of World Ozone Day is '**Montreal Protocol — Keeping us, our food, and vaccines cool**'. It is celebrated to spread awareness among people about the depletion of the Ozone Layer and search for possible solutions to preserve it. The competition helped the students to develop creative writing skills and to reinforce the need for protect our Nature for better tomorrow among the minds of younger generation.

Herbal Garden Maintenance and Naming

Date: October 10,2021

Venue: Ayurvedic Garden, College Campus

Report: The department maintains a herbal garden with the support of NSS and a weeding and pruning drive was organized on October 10, 2021.

Outcome: The activity raised awareness among students on the importance on the locally available medicinal plants. They also understood to conserve rare varieties of plants that are on the verge of extinction.

Eco friendly initiatives: Paper Pen Making Workshop

Date:12.11.2021

Venue: S 21

Report: An intradepartmental paper pen making workshop was organized on 12.11.2021 for the students of the department. All the students and teachers were participants.

Outcome: The programme gave exposure to skill development in making paper pens.

World Water Day celebration 2022

Date: 22.03.2022

Venue: St. Paul's College, Kalamassery

Report

One of the essential elements of earth, water is the prime necessity of life. All living animals and plants cease to exist without it. Hence, the proverb says, "Water is life". However, with the increasing industrialisation, over-use, and exploitation of all-natural sources, human life is facing some questionable situations such as acute water shortage. As water is an essential building block of existence, each year March 22 is celebrated as World Water Day to raise public awareness about the significance of fresh water and sustainable management of this significant resource.

Officially the idea of World Water Day was a resolution adopted by the UN General Assembly conference on Environmental and Development in Rio De Janeiro in 1992. It was then that the United Nations General Assembly adopted a resolution stating that every year, March 22 will be marked as World Water Day starting 1993. And since 1993, this day has continued as an annual event to increase community awareness about understanding the importance of water conservation.

Approximately 99% of all liquid freshwater on earth, groundwater provides societies with a huge number of benefits and opportunities. But experts say due to anthropogenic hazards major water depletion and pollution are now affecting the life and livelihood of billions of people. So, in the context of growing scarcity, the rich groundwater which contributes to the regular use of water for domestic use by the global population can no longer be overlooked.

For that reason, every year, this World Water Day is promoted globally by UN agencies to stimulate people across the world by organising promotional activities to encourage the people, make them address the critical water issues, and also coordinate with the international activities. According to the United Nations (UN) website, the main purpose of this day is to "support the achievement of sustainable development goal (SDG) 6 : water and sanitation for all by 2030."

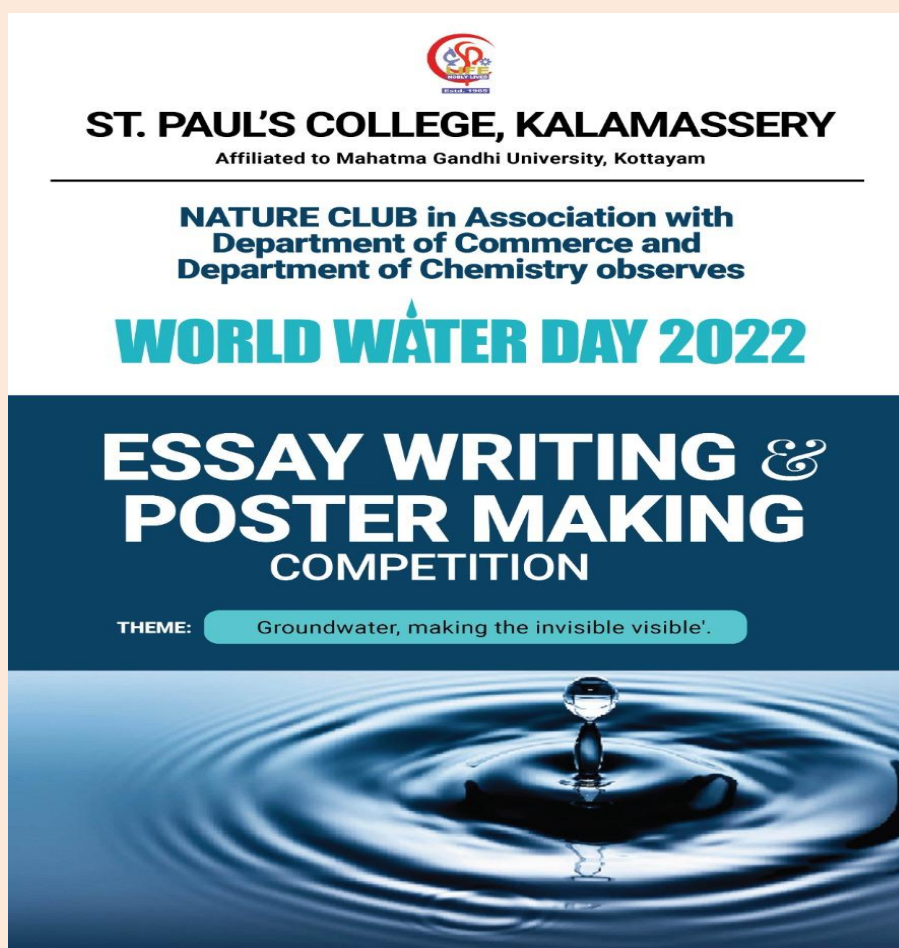

'Groundwater: Making the Invisible Visible' is the theme of World Water Day 2022, proposed by IGRAC. "Groundwater is invisible, but its impact is visible everywhere. Out of sight, under our feet, groundwater is a hidden treasure that enriches our lives. Almost all of the liquid freshwater in the world is groundwater. As climate change gets worse, groundwater will become more and more critical. We need to work together to sustainably manage this precious resource. Groundwater may be out of sight, but it must not be out of mind," worldwaterday.org wrote, stressing the importance of groundwater. This year, the day asks everyone to protect groundwater from overexploitation – abstracting more water than is recharged by rain and snow – and the pollution caused to it. To survive and adapt to climate change and meet the needs of a growing population, exploring, protecting and sustainably using groundwater will be central, the United Nation stated.

As part of world water day celebration 2022, Nature club in association with Department of Chemistry and Department of Commerce organised an inter-departmental essay writing competition and poster making competition. The theme for essay writing competition was ‘Groundwater: Making the Invisible Visible’ and that for poster making competition was water and beauty.

Neelanjana Anil, 1st year B.A English Model 2, secured first prize and Nasila M J secured second prize in essay writing competition. Shima Mathew of 1st MSc chemistry secured first prize and Athira V Thilakan of 1st BSc Chemistry secured second prize for poster making competition. Athira V Thilakan of 1st BSc Chemistry secured second prize.

Outcome:

The programme aimed to encourage the student, make them understand the water issues. Also helped to spread awareness about water scarcity. **Water is the prime necessity to sustain life on the Earth.**

Shima Mathew of 1st MSc chemistry secured first prize for poster making

Athira V Thilakan of 1st BSc Chemistry secured second prize

Observation of the Earth Hour

Date: 26.03.2022

Objective: To develop concern for the earth and make conscious attempts to mitigate the harm done to it.

Report: The staff and students of the department joined together to observe the earth hour by switching off all the lights and other electric devices from 8.30 pm to 9.30 pm. Ms. Deepa George, Head coordinated the earth hour programme.

Outcome: The students had a better understanding of the need to protect our environment.

St. Paul's College, Kalamassery

DEPARTMENT OF ENGLISH
observes

Join millions of people around the world and switch off
your lights in support of nature and our planet on
Saturday, 26 March, 2022 at 8:30 PM to 9:30 PM.

OBSERVANCE OF EARTH HOUR 2022

Report:

We live on a beautiful and unique planet. It's the only planet in the universe that supports life. But human activities are now putting our planet in danger. Changing climate has a very bad effect on our environment. The increasing concern gave rise to the idea of Earth hour. Earth Hour, organized by World Wildlife Fund WWF, is a global grassroots movement uniting people to take action on environmental issues and protect the planet. Engaging a massive mainstream community, Earth Hour was famously started as a lights out event in Sydney, Australia in 2007. The event is held annually, encouraging individuals, communities, and businesses to turn off non-essential electric lights, for one hour, from 8:30 to 9:30 p.m. on the last Saturday of March, as a symbol of commitment to the planet. The theme of this year's Earth Hour is '**Shape Our Future**'. It is a pivotal year for everyone to shape the world for the future generations by raising awareness about the damages to climate that are impacting our world today.

Faculty of St. Paul's College, Kalamassery observed Earth Hour 2022 by switching off the non-essential lights from 8:30 – 9:30 pm on Saturday 26th March 2022.

Outcome:

Observance of Earth Hour 2022 helped students, teaching and non-teaching staffs to know more about global warming, nature, and biodiversity and the importance to conserve our mother Nature.
